

WT HUB – The Efficient Connection

**Allows for cost-effective and synchronized use of devices -
the fume extraction unit is only in operation while the user is soldering.**

WT HUB

- > Connects the Zero Smog TL fume extraction unit to one or two soldering stations, enabling a synchronized operation of the devices
- > The fume extraction unit is in operation only during the use of the soldering iron
- > When the soldering iron is not being used, the Zero Smog TL goes into a stand-by mode
- > As a result the filter life time is prolonged, noise levels are lowered and overall energy efficiency gets significantly improved

Order - No.: T005 87 687 67

Fume Extraction Zero Smog TL

- > Providing clean air to your workplace at the lowest noise level
- > Portable, for placement under or next to the bench
- > Quick and simple installation with Easy-Click system

Soldering Station Technology Line WT 1010

- > Setting new standards in user-friendliness
- > Best in class – attractive price / performance ratio
- > Maximum flexibility – backward compatibility with existing soldering tools
