

Mini Relay K (Open – Sealed)

- Limiting continuous current 20A
- 24VDC coil versions available

Typical applications

Car alarm, hazard warning signal, heated rear screen, immobilizer, lamps front/rear, fog light, interior lights, sun roof, turn signal, wiper control.

1) The values apply to a resistive load or inductive load with suitable spark suppression and at maximum 13.5VDC for 12VDC and 27VDC for 24VDC load voltages.

2) For a load current duration of maximum 3s for a make/break ratio of 1:10.

3) Corresponds to the peak inrush current on initial actuation (cold filament).

4) See chapter Diagnostics of Relays in our Application Notes or consult the internet at <http://relays.te.com/appnotes>

5) For unsuppressed relay coil. A low resistive suppression device in parallel to the relay coil increases the release time and reduces the lifetime caused by increased erosion and/or higher risk of contact tack welding (monostable version only).

Max. DC load breaking capacity

Load limit curve 1: safe shutdown, connected as form X, load on pin 5 and 7.
 Load limit curve 2: safe shutdown, no stationary arc (NO contact).
 Load limit curve 3: arc extinguishes during transit time (CO contact).
 Load limit curves measured with low inductive resistors verified for 1000 switching events.

Coil code	Rated voltage VDC	Operate voltage VDC	Release voltage VDC	Coil resistance $\Omega \pm 10\%$	Rated coil power W
061	12	6.9	1.2	130	1.1
062	24	14.1	2.4	520	1.1

All figures are given for coil without pre-energization, at ambient temperature +23°C.

Coil operating range

Does not take into account the temperature rise due to the contact current
E = pre-energization.
