

Conettix Ethernet Communication Modules

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Full two-way IP event reporting with remote control panel programming support
- ▶ 10/100 Base-T Ethernet communication for IPv6 and IPv4 networks
- ▶ NIST-FIPS197 Certified for 128-bit to 256-bit AES Encrypted Line Security
- ▶ Plug and Play installation, including UPnP service to enable remote programming behind firewalls
- ▶ Advanced configuration by browser, RPS, or A-Link

The Conettix Ethernet Communication Modules are four-wire powered SDI, SDI2, and Option bus devices that provides two-way communication with compatible control panels over IPv4 or IPv6 Ethernet networks.

Typical applications include:

- Reporting and path supervision to a Conettix Communications Receiver/Gateway.
- Remote administration and control with Remote Programming Software or A-Link.
- Connection to building automation and integration applications.

System overview

The modules (B426/B426-M) are built for a wide variety of secure commercial and industrial applications. Flexible end-to-end path supervision, AES encryption, and anti-substitution features make the modules desirable for high security and fire monitoring applications. Use the modules as stand-alone paths or with another communication technology.

| Callout — Description | Callout — Description |
|------------------------------------|--|
| 1 — Compatible Bosch control panel | 7 — Conettix D6100i Communications Receiver/Gateway and/or Conettix D6600 Communications Receiver/Gateway (Conettix D6600 Communications Receiver/Gateway requires 8, 9, and 10) |

| | |
|---|--|
| 2 — Data bus connection between the control panel and the module | 8 — Ethernet network connection to the Ethernet adapter (D6680/ITS-D6682/ITS-D6686) (ITS-D6682 shown) Ethernet Network Adapter |
| 3 — B426/B426-M | 9 — Conettix Ethernet Network Adapter (ITS-D6682 shown) |
| 4 — Ethernet connection between the module and the Ethernet network | 10 — Connection from ITS-D6682 to the COM4 Port on the Conettix D6600 Communications Receiver/Gateway |
| 5 — Ethernet network, Local Area Network (LAN), Metropolitan Area Network (MAN), Wide Area Network (WAN), or Internet | 11 — Ethernet network connection between the host computer Ethernet network interface card (NIC) and the Ethernet network |
| 6 — Ethernet network connection to the D6100i Communications Receiver (D6100i/D6100IPv6) | 12 — Host PC running Remote Programming Software, Automation, or the Conettix D6200 Programming/Administration Software |

Functions

Conettix IP communication

The module uses Conettix IP protocol which supports:

- Full event code reporting and administration
- Flexible supervision intervals
- Resistance to Denial of Service attacks
- 128, 192, or 256-bit AES encryption
- Anti-replay and anti-substitution

Addressing

Use the address switch to easily assign a bus address or setup for web configuration.

IP network support

The modules support DHCP, UPnP, and Auto IP addressing by default, but can also be configured for Static IP networks. The module is compatible with IPv6 or IPv4 networks. With compatible control panels, it supports reporting to receivers with Domain Name System (DNS) hostnames for automatic disaster recovery.

Easy configuration

For most installations, the default module settings allow installation with no computer required. An address switch allows easy bus address selection. Universal Plug and Play (UPnP) supports automatic UDP port mapping for remote programming systems when behind a firewall, as well as HTTP port mapping for module web configuration. Auto IP enables a direct PC connection without changing any PC network settings.

For customized network settings, the modules support a full web configuration menu. The following control panels support RPS programming:

- B9512G/B9512G-E
- B8512G/B8512G-E

- B6512
- B5512/B5512E
- B4512/B4512E
- B3512/B3512E
- D9412GV4/D7412GV4/D7212GV4

LEDs

Three LEDs provide status and troubleshooting information.

| LED | Indication |
|-----------|--|
| Heartbeat | Module and control panel connection status |
| RX | An inbound packet is received on the bus |
| TX | An outbound packet is transmitted on the bus |

Fire monitoring applications

The B426 meets UL864 and NFPA72 standards for Single Communication Technology with approved Bosch control panels.

Certifications and approvals

The modules have NIST FIPS-197 AES Certification (IP Communications).

Notice

The B426-M has received certifications only as noted. If not noted, the certification applies to the B426 only.

Installation/configuration notes

Mounting considerations

Mount the module into the enclosure's 3-hole mounting pattern using the supplied mounting screws and mounting bracket.

Wiring considerations

The module connects to a control panel using a data bus connection and to an Ethernet network using a standard Category 5 or above Ethernet cable with an RJ-45 plug.

Environmental considerations

| | |
|-------------------------|----------------------------|
| Relative humidity | Up to 93% non-condensing |
| Temperature (operating) | 0° - +49°C (+32° - +120°F) |

Properties

| | |
|------------------|---|
| Board dimensions | 59.5 mm x 108 mm x 16 mm (2.19 in x 4.25 in x 0.629 in) |
|------------------|---|

Power requirements

| | |
|-------------------|----------------|
| Current (maximum) | 100 mA max |
| Current (standby) | 80 mA |
| Voltage | 12 VDC nominal |

Connectors

| | |
|---------|-------------------------------|
| LAN/WAN | RJ-45 modular port (Ethernet) |
|---------|-------------------------------|

Cabling

| | |
|-----------------------|--|
| Ethernet cable | Category 5 or better unshielded twisted pair |
| Ethernet cable length | 100 m (328 ft) max length |

Wiring

| | |
|----------------------|---|
| Data bus wire gauge | 18 AWG or 22 AWG |
| Data bus wire length | Maximum distance - Wire size : 150 m (500 ft) - 0.65 mm (22 AWG) 300 m (1000 ft) - 1.02 mm (18 AWG) |

Ordering information

B426 Ethernet Communication Module

Supports two-way communications over Ethernet networks for compatible control panels
Order number **B426**

B426-M Ethernet communication module, mobile

Supports Ethernet communication for remote programming and mobile apps on AMAX and Solution Series control panels
Order number **B426-M**
