

**DESCRIPTION**

The NEC TOKIN EP2 / EP1 series are PC-board mount type automotive relays suitable for various motor controls and other applications that require a high level of quality and performance.

EP2 series is a twin-relay and divided into two types for different usage.

One is an H-bridge type designed for forward and reverse control of the motors, and the other, a separate type containing two separated relays in one package.

EP1 series is a 1 Form c relay equivalent to EP2 series in performance.

**FEATURES**

- For motor reversible control and solenoid control
- Approx. 50% less relay space than conventional relay
- High performance and productivity by unique structure
- Flux tight housing

**APPLICATIONS**

- Power window
- Antenna lifter
- Auto-seat positioning
- Electrical door lock
- Passive seat belt control
- Keyless/Remote entry system
- Sliding roof control

NUMBERING SYSTEM

TYPICAL APPLICATION (H Bridge Type)

MOTOR	Tr1	Tr2
STOP	off	off
FORWARD	on	off
REVERSE	off	on

It is necessary to take more than 100 ms intervals for on / off timing between driving Tr1 and Tr2. If the interval is less than 100 ms, an excessive current happens to flow to the relay contacts.
